CHAPTER 1

Section A. Officer Billet Code System

1. Purpose. The Officer Billet Code (OBC) system has been designed to provide program and personnel managers with more descriptive information about each Coast Guard officer billet. The following is an explanation of the coding system:

Digit	1	2	3	4	5	6
Example	6	0	4	1	6	A

(a) DIGITS 1 & 2: Primary Occupational Field identifier, assigned according to table one. This identifier represents the functional field of the billet, and not necessarily the qualification requirements of the incumbent.

(b) DIGIT 3: Organizational Level Code, assigned according to table two.

(c) DIGIT 4: Job position code within the given level of organization; assigned according to table three. The job position descriptions in table three will be refined further as the need to identify particular billets is determined.

(d) DIGIT 5: Authorized grade indicator (i.e. Captain = 6).

(e) DIGIT 6: An alpha indicator assigned to identify billets with attributes of particular interest, or to distinguish between certain billets which are otherwise identical. The use of this digit will be refined further to meet the needs of program and personne1 managers.

In the example above, OBC 60416A identifies a captain billet, commanding officer of an air station.

2. Warrant officer billets have temporarily been coded with a "1" in the grade indicator (digit no. 5).

CHAPTER 4

Section A. Listing of Authorized Bi11ets

1. Purpose. A listing of commissioned, USPHS, and warrant officer billets (enclosures (1), (2), and (3) provides general information about authorized billets on a Servicewide basis. The listing is completely valid only on the date it is compiled. Regularly, billet changes occur through additions, deletions, relocation's, upgradings, downgradings, and other personnel allowance actions. Therefore, the information contained herein should not be used in any official statement concerning authorized personnel allowances. The sole intent of this list is to provide the officer corps information upon which to formulate assignment requests.

2. Use of the Manual. Officers using this Manual to develop their assignment requests are cautioned to note that this is a complete billet inventory as of December 1997. The availability of any specific billet is also keyed to normal tour length rotation. That information is available annually in the shopping list and/or directly from assignment officers.
